3. BASIS OF PREPARATION OF CONSOLIDATED FINANCIAL STATEMENTS

Statement of compliance

The consolidated financial statements have been prepared in accordance with HKFRSs (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). For the purpose of preparation of the consolidated financial statements, information is considered material if such information is reasonably expected to influence decisions made by primary users. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange (the "Listing Rules") and by the Hong Kong Companies Ordinance.

Basis of preparation of financial statements

The consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies set out below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of HKFRS 2, leasing transactions that are within the scope of HKFRS 16, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in HKAS 2 or value in use in HKAS36.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

4. OPERATING SEGMENT

An operating segment is a component of the Group that is engaged in business activities from which the Group may earn revenue and incur expenses, and is identified on the basis of the internal management reporting information that is provided to and regularly reviewed by the Group's chief operating decision maker in order to allocate resources and assess performance of the segment. During the year ended, the information reported to the executive directors, who are the chief operating decision makers for the purpose of resource allocation and assessment of performance, do not contain profit or loss information of each product line or geographical area and the executive directors reviewed the financial result of the Group as a whole report under HKFRSs.

The Group currently operates one operating segment which is revenue from sale of the confectionary products. Accordingly, the Group does not have separately reportable segments.

MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY OVERVIEW

Since the outbreak of COVID-19, major cities in the People's Republic of China (the "PRC") have taken emergency public health measures including travel restrictions to control the COVID-19 epidemic. Our Group has implemented various measures in response to the COVID-19 epidemic to strengthen our existing business.

Our Directors confirm that as at the date of this announcement, there had been no material impact on the supply of products and/or raw materials to our Group, due to the outbreak of COVID-19.

BUSINESS REVIEW

We are a confectionary products manufacturer in the PRC. We manufacture and sell confectionary products, including gum-based candies, tablet candies, aerated candies and hard candies. We generally source raw materials from our suppliers, manufacture and package our confectionary products at our in-house production facilities, and either (i) sell our products under brands owned or licenced by our OEM customers in the PRC and to overseas countries or (ii) sell our products under our own brands, namely Coolsa (酷莎), Lalabo (拉拉卜) and Jiujiuwang (久久王), to distributors and end-consumers in the PRC. We own and operate our production facilities for the manufacturing of our confectionary products with a view to controlling our product quality, production costs and production schedule directly. Our factory is located in Jinjiang City, Fujian Province with a large site area, with a number of production lines to produce large quantities of our products.

During the year ended 31 December 2023, the Group recorded a profit of approximately RMB4.9 million as compared to a profit of approximately RMB16.1 million for the corresponding period in 2022. The decrease was mainly due to a decrease in gross profit of approximately RMB12.3 million.

PROSPECT

Our business objective is to strive to achieve sustainable growth and further enhance our position as a manufacturer of confectionary products in the PRC.

Historically, we are a confectionary products manufacturer in the PRC. We have focused on manufacturing and selling confectionary products, including gum-based candies, tablet candies, aerated candies and hard candies. We own and operate our production facilities for the manufacturing of our confectionary products with a view to controlling our product quality, production costs and production schedule directly. We believe that production facilities, product development and quality control are crucial to our competitiveness and success. Thus, we will put significant emphasis on purchasing and introducing new production lines, as well as purchasing new equipment and machines for the replacement of existing machines and equipment. We will also place emphasis on product development and commit to enhancing product quality to cater for changing consumer preferences and enhancing our product offerings.

One of our business strategies is to leverage on our production and product development capacities and experience in the manufacture and sale of our own-branded products. We manufacture and sell our confectionary products under brands owned or licenced by OEM customers in the PRC and to overseas countries. To enhance our marketing, we will continue to engage a marketing firm for the promotion of our brands to strengthen our market position in the confectionary industry in the PRC and enhance our brand recognition and awareness, so as to increase our sales through e-commerce channels and enhance our distribution network.

We believe that the above business strategies will allow us to take advantage of the business opportunities and explore new markets with significant growth potential in the PRC. Looking ahead, the Group will endeavor to strengthen the development of its businesses to provide steady return as well as growth prospects for the Shareholders.

The decrease in revenue was mainly attributable to the decrease in the sales of our own-branded products.

Cost of sales

The Group's cost of sales mainly comprised of (i) direct materials costs, (ii) production costs; and (iii) direct labour costs. For the years ended 31 December 2022 and 2023, the cost of sales amounted to approximately RMB264.6 million and RMB252.3 million, respectively, representing a decrease of approximately 4.6%, which was generally in line with the decrease in revenue for the same year.

The decrease in gross profit was generally in line with the decrease in revenue for the same period. The Group's gross profit margin amounted to approximately 28.3% and 29.7% for the year ended 31 December 2023 and 2022, respectively, which was mainly attributable to the increase in sales of OEM products, which have lower gross profit margin than own-branded products.

Other income, gain or (loss), net

The Group's other income, gain or (loss), net increase from a net loss of approximately RMB2.3 million for the year ended 31 December 2022 to a net loss of approximately RMB4.7 million for the year ended 31 December 2023. The Group's selling expenses decrease from approximately RMB37.3 million for the year ended 31 December 2022 to approximately RMB34.8 million for the year ended 31 December 2023, respectively. The Group's administrative expenses remained relatively stable at approximately RMB33.4 million for the year ended 31 December 2022 and approximately RMB34.6 million for the year ended 31 December 2023.

Income tax expenses

The Group's income tax expenses were approximately RMB9.4 million and RMB6.1 million for the years ended 31 December 2022 and 2023, respectively. The decrease was mainly due to the decrease in taxable profit for the year ended 31 December 2023.

Finance costs

The Group's finance costs increased from approximately RMB13.1 million for the year ended 31 December 2022 to approximately RMB13.6 million for the year ended 31 December 2023. The Company has fully utilised all the proceeds from the Listing before 31 December 2022.

PRINCIPAL RISKS AND UNCERTAINTIES

The following are the principal risks and uncertainties faced by the Group, which may materially and adversely affect its business, financial condition or results of operations:

- 1. Substantial amount of our revenue from OEM customers was derived from a few major OEM customers.
- 2. The Group relies on our third party distributors for the sale of our owned-branded products to their respective subdistributors and retailers. Termination of or failure to renew our distribution agreements with our third party distributors may significantly decrease the sale of our owned-branded products.
- 3. The Group's business may be negatively affected if our third party distributors fail to comply with our distribution policies and if our third party distributors fail to perform as expected.

- 4. The Group generally does not enter into long term contracts nor contracts with minimum purchase requirement with our customers.
- 5. Unfavourable fluctuations in price, availability and quality of raw materials could cause material production delays and materially increase our costs of sales.
- 6. The outbreak of COVID-19 may cause damage to the economy and as a result may adversely affect our business, results of operations and financial performance.
- 7. The Group's business is susceptible to food-borne illness claims and product liability claims, which may increase the likelihood of reputational risk.

FUTURE PLANS FOR MATERIAL INVESTMENTS AND CAPITAL ASSETS

Saved as disclosed in the Prospectus, the Group did not have other plans for material investments and capital assets as at 31 December 2023.

Principal risks and uncertainties in achieving our business strategies

Up to the date of this announcement, the Group has faced certain risks and uncertainties in achieving our business strategies in accordance with the use of proceeds plan as set out in the Prospectus, and which are summarised as follows:

- (1) The outbreak of the COVID-19 or other pandemic disease may cause damage to the economy and as a result may adversely affect our business plan to expand our production capacities and replace the machines in existing production lines;
- (2) When achieving our business plans, timing is everything. The Group may fail to grasp the business trend to determine the optimal time to hit the market or promote our brands; and
- (3) In an increasingly volatile and complex trading environment, the Group may face changes in consumer behavior and high competition when we launch our marketing plan.

In order to alleviate the above risks and uncertainties in achieving our business strategies, we will ensure that our business plans are as resilient as possible to meet these challenges.
